

Research Process Model

GOOD RESEARCHERS...

Before Researching

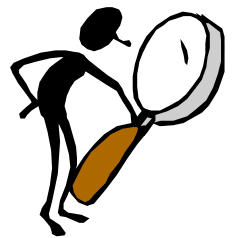

Define Information Need

- What do I need to do?
- What information do I need to find out?
- What are the keywords?

Determine Strategies

- Where will I look for information?
- Which sources will be the most helpful?

While Researching

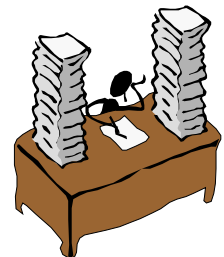

Locate and Access

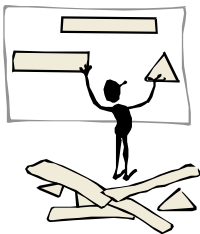

- Where will I find these sources?
- How will I find what I need in these sources?

Analyze and Extract

- Did I get enough useful information from the sources? If not, where will I go for more useful information?
- How will I record the information?

After Researching

Organize and Present

- How will I organize the information?
- How will I present the information?

Evaluate the Process and Product

- What was the hardest part of completing the assignment?
- How could I improve what I did?
