

Instructions for Enrolling in MastercamU

Here are the steps to enroll in a Mastercam course.

STEP ONE:

The screenshot shows the Mastercam University website. The browser title is "Welcome! Mastercam University - Windows Internet Explorer". The address bar shows the URL: http://www.mastercamu.com/lms/login_formMC.cfm?&hydr=&user_id=unknown&scdver=. The page features the Mastercam University logo at the top. Below the logo, there is a "Great Training" section with a list of bullet points: "Looking for quality Mastercam training?", "Trying to find an easy way to advance your career?", "Wish you could become Mastercam Certified?", and "Need extra help learning the latest version of Mastercam?". A paragraph follows, stating: "Learn at your own pace and benefit from the knowledge of expert corporate trainers who bring their extensive industrial experience and Mastercam mastery to each lesson. Courseware is delivered in a progressive order using movies to demonstrate proven industrial techniques." Below this is an "Available Courses" section with three items: "Mill Design and Toolpaths", "Lathe Design and Toolpaths", and "Advanced Mill Design and Toolpaths", each with a "Syllabus" link. A "User Log In" section contains fields for "User Name:" and "Password:" with a "Log In" button. Below the login section is a "User Registration" section with a "register" button. A large red watermark is overlaid on the page, reading: "Go to www.mastercamU.com an account, and visit www.mastercamU.com for a subscription link. Click on the registration link camU on your Mastercam reseller. [click here to register.](#)" At the bottom of the page, there is a "School Specific Courses and Information" section with two items: "Instructor Certification" (Syllabus) and "STEM Enhancement Modules" (Available for 2009-2010 year). A small icon and text "How to integrate MastercamU into your classroom." are also visible. The browser status bar at the bottom shows the URL: http://www.mastercamu.com/lms/registration/registration.cfm?&hydr=&user_id=unknown&scdver=.
