

Developed vs. Developing Countries Poster

In pairs, compare and contrast two countries and demographics. One country must be developed (e.g. United States) and another developing (e.g. Republic of Congo). Make a table that compares the following...

- Population
- Age structure diagram (draw it!)
- Fertility Rate
- Migration (migration/immigration)
- Birth Rate/Death Rate
- Life Expectancy
- Stage of Transition (which stage of transitional growth are they in? pg223)
- Two pictures (of anything relating to the country)
