

Childhood – Adolescent Development Project

This project is to show your development from infancy through late adolescence. You will need the following materials for this project:

1. Poster Board
2. Pictures
3. Markers, Color Pencils, etc.

You will use your pictures and create a growth timeline. You should cover the stages we discussed with Jean Piaget, Erik Erikson, and Kohlberg (You have notes on these stages and they are in your textbook). You will need to have a picture for each stage and an accompanying paragraph for each theorist. In each paragraph you will discuss the changes that Piaget, Erikson and Kohlberg talked about and provide examples of you engaging in that behavior/stage. You should include physical and personality changes in your paragraph. You should also include information on any accomplishments or achievements that happened or any events that helped to shape this stage. For the early stages, you will probably need your parents help.

This project is about you. Be creative in your presentation. You should cover up to Erikson's fifth stage, Kohlberg's fourth stage, and all four of Piaget's stages.

The due date for this project is 9/24/10. You will not be given class time to complete this project. You will present your project in class.

Point Values

Poster Board: 70 points (30 for pictures/layout, 40 for paragraphs)

Presentation: 30 points

Under **no** circumstances will a **late** project be accepted.
