

Chapter 10

1. What strategies do we use to solve problems, and what obstacles hinder our problem solving?
2. How do we arrive at the hundreds of decisions & judgments we make each day? What biases & tendencies put us at risk for error?
3. When do children acquire language? Is it an inborn capacity or something we develop by association, imitation & reinforcement?
4. Does all thinking depend on language and to what extent does it control what we think, perceive & remember?
