

Chapter 2 Reflections:

This chapter focused on the brain, the nervous system, and the endocrine system. We discussed the roles of the nervous and endocrine system as it relates to sending and receiving information to the brain. With the brain, we discussed the various structures and functions of the brain. We took a look at the idea of plasticity and procedures such as the split-brain operation and a hemispherectomy.

For your reflection you will need to answer the following:

What did I find interesting about this chapter?

Why was it important to study this material?

How can I see examples of this information in my daily activities, my environment, and myself?

Please make sure to follow APA format. Please include a title page, abstract, as well as at least two and a half pages for the above questions.
